EXCAVATING HIDDEN LIVES IN ROMAN POMPEII

7TH ANNUAL **SIENKEWICZ LECTURE** ON ROMAN ARCHAEOLOGY

**7:30 PM MONDAY
NOVEMBER 13**

**MORGAN ROOM, POLING HALL
MONMOUTH COLLEGE**

Pompeii, destroyed by the volcano Mount Vesuvius in the year 79 C.E., has long occupied a privileged place in modern imaginings of the Roman past. Beyond the city's well-known monuments lies a well of data that has barely begun to be tapped. This talk will introduce the research program of Tulane University's Pompeii I.14 Project, an excavation that brings the most cutting-edge archaeological technologies to stratigraphic exploration below the floors, streets and sidewalks buried by Vesuvius.

The Thomas J. and Anne W. Sienkewicz Lecture on Roman Archaeology honors one of Monmouth's most broadly influential faculty members, Tom Sienkewicz, who retired as Minnie Billings Capron Chair of Classical Languages in 2017 after 33 years at the College.
